

Industrial slab

Car showroom Singer, Kaufbeuren (DE)

Application	Flooring
Object	Car showroom, polished
Size	500 m ²
Country	Germany
Year	2019
Fibre	Fibrofor High Grade

Description

New construction of the showroom for the Singer dealership. It is a classic floating 200 mm thick industrial floor with cut joints in a grid of 5 x 5 m on 100 mm XPS insulation.

The surface has been polished to suit an exhibition space for new cars.

Supported by *Fabrino Produktionsgesellschaft mbH & Co. KG* our qualified and long-term experienced partner in Germany.

Key advantages of the Fibrofor High Grade Solution

- Cost reduction (shorter construction time, much less steel mesh installation)
- Reduction of early-shrinkage cracks in concrete and increasing the wear resistance
- Various surface treatments are possible, e.g. polishing, broom and coating
- Corrosion-free reinforcement
- Reduces the water penetration depth in concrete
- Tailor made static calculation based on latest standards
