

Outside slab

American Football Field– Universidad Autónoma de Nuevo León, Monterrey (MX)

Application	Outside slab
Object	American Football Field
Size	10,000 m ²
Country	Mexico
Year	2018
Fiber	Fibrofor High Grade

Description

The University decided to use a *modern and economical reinforcement system* for this new sports field in their campus area. The execution of the *foundation slab* had to be carried out at night time because of the high temperature during the day in summer time in Monterrey. The challenge was to find an economical and fast system to complete the foundation in a short time.

Key advantages of the Fibrofor High Grade Solution

- Massive time savings (construction time)
- Reduced labor cost (no/less installation time for steel)
- Improved shrinkage characteristics of concrete
